

M 98

HAND MICROPHONE

BENEFITS

- Rugged: self-extinguishing ABS body
- Waterproof version
- Reliable
- Ergonomic

APPLICATIONS

M98 is a range of microphones intended for intercom, sound system, telecommunication and radio communication applications.

Some models are suitable for use outdoors and in the most severe environments (vibration, salt spray, magnetic perturbation, chemical agents).

They are widely used in fields such as:

- Air traffic control
- Marine (engine room, lifeboats)
- Civil safety (emergency vehicles)
- Industry (metallurgy, chemical, etc.)
- Transport (trams, trains, buses)
- Security sound systems

M 98

FEATURES

- Push to talk
- Microphone : dynamic or electret
- Directivity: omni-directionnal or differential
- Cord: straight or coiled - 4 or 6 conductives
- Length: ≈140 mm and on demand
- Diameter: ≈38 mm
- Weight without cord (depends on the type of cell) : 150 to 180g

INTERFACES

- Radio
- Intercom system
- Sound system

Cell type	Dynamic		Electret	
	omni-directionnal	directionnal	omni-directionnal	directionnal
