

HH-425

HANDSET HOLDER

BENEFITS

- Secure attachment when vehicle is running
- Easy pick up / hang up
- Protection for the handset

APPLICATIONS

The handset holder **HH-425** is compatible with most military handsets and their applications in harsh environmental conditions. It allows to fix the radio or intercom handsets in vehicles.

Designed and manufactured to military standards, the **HH-425** is not sensitive to shock and vibration. Thanks to its robust design it is suitable for all-terrain use.

Using the **HH-425** is simple: the top of the handset (earphone) is inserted into the hole of the bracket. The handset reaches its locking position by rotation downwards. It is then kept in the rest position and comes off simply by rotating up.

HH-425

FEATURES
